Index of Keywords

Actin 97
Actin binding proteins 18
Agarose 130
Alginate 130
Arabidopsis thaliana 89
Ascorbate 85
Azolla filiculoides 1

BALB/c3T3 cells 85
Biparental plastid inheritance 68

Cell cycle 75
Cell division 155
Cell organelle transport 107
Cell wall 57, 139, 148
Centrioles 75
Chloroplastic DNA 42
Colonies 130
Cortical ultrastructure 168
Cotyledons 130
Crypt cell 120
Cyanobiont 1
Cytoplasmic channel 155
Cytoplasmic organization 107
Cytoskeleton 97, 107, 168

Dictyostelium 18
Dictyota dichotoma 75
Digoxigenin 9

Embryo culture 89
Endoplasmic reticulum 120, 168
Erythrocladia subintegra 57

Fluorescence microscopy 107
Freeze-fracture 57
Freeze-substitution 28, 168
Funaria 168

Generative cell 68

Hellianthus annuus 130
Heterocysts 1
High-pressure freezing 28

Immunogold labeling 1
In situ hybridization 9
Intercellular transport 28
Iron-superoxide dismutase 1

Lectin 49
Lycopersicon esculentum 139

Maternal plastid inheritance 68
Meiosis 9
Microfibril-synthesizing terminal complexes 57
Micrasterias 148
Microfibrils 148
Microsporogenesis 139
Microtubule inhibitors 148
Microtubules 75, 97, 148
Mitotic spindle 75
Molluscicide 120
Morphogenesis 155
Mucous cell 120

Nicotiana tabacum 9, 28
Nitrogenase 1
Nuclease C 68

Pea root 97
Phaeophyceae 42
Phagocytosis 18
S phase 85
Plasma membrane 49
Plasmodesmata 28
Plastid nucleoids 68
Plastokinesis 155
Polarity 97, 155
Pollen development 9, 139
Poly(A)+ RNA 9
Propane-jet freezing 28
Prophase I 139
Protoplast isolation 49
Protoplasts 42, 130

Regeneration 42

Septum 155
Slug 120
Somatic embryogenesis 89
Spongilla lacustris 107
Storage cell 120

Ultrastructure 139

Vegetative cell 42

Wound 97

Zea mays 49
Zoid development 42
